

# TMS MNWIN

## Maintenance Module

### Mileage & Fuel Ticket Entry Procedure:

This procedure allows you to periodically enter meter readings and usage of fuel, oil and up to 3 additional user defined fluids. These entries are helpful in keeping the unit meter readings up to date in addition to tracking fuel usage and MPG. Unit meter readings are essential for the system to perform properly. Information entered in this section is used on several MNWIN reports for cost purposes.

After choosing your unit type and unit id , you are presented with an ADD screen for manually entering your information.

The screenshot shows a software window titled "Mileage And Fuel Ticket Detail". The window contains the following fields and data:

Date			
11/28/12			
Meter Readings			
Hub	Speedometer	Chronometer	
Current	285145.0	0.0	0.0
Fuel Added	68.190	Rate	3.239
Oil Added	0.0	Rate	0.000
DEF Added	1.000		3.120
TRAN Added	3.000		0.990
		Cost \$	220.87
		Cost \$	0.00
			3.12
			2.97
Vendor			
ABC			
Trip Number			
45294			
Driver Name			
Jones			
Reference			

At the bottom right of the window are "OK" and "Cancel" buttons.

There are additional automatic methods of gathering your fuel information from our other modules. Please contact TMS support staff for more information.
