

## Print Labels

Print Labels on the Report Menu

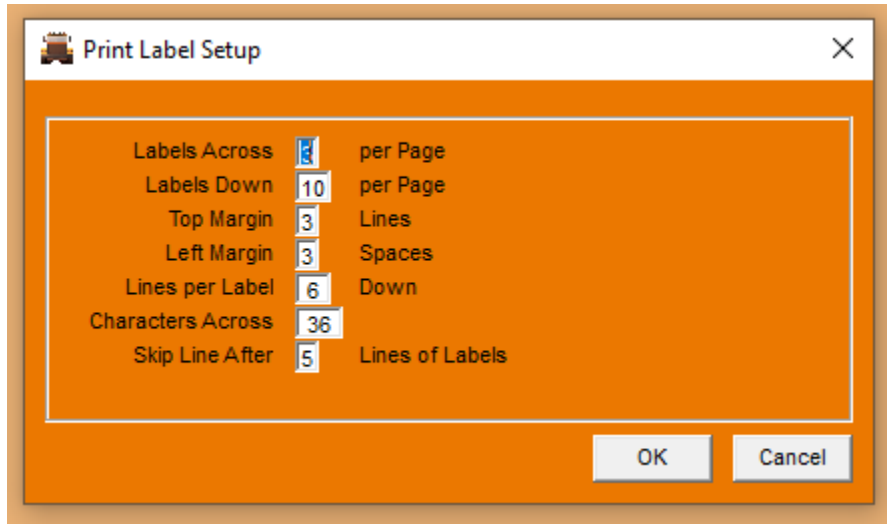

The address label sub menu

The address label section may be used to print labels for customers, vendors, carriers and drivers, or for return address labels for your own company. The "OTHER" section can be used for anything you want to fill in the blanks, instead of pulling from the files already existing in Dispatch.

Print Label Setup (similar to other label setup)

The image shows a dialog box titled "Print Label Setup" with a close button (X) in the top right corner. The dialog box has an orange background and contains several input fields for configuring label printing settings. The settings are as follows:

Setting	Value	Unit/Description
Labels Across	3	per Page
Labels Down	10	per Page
Top Margin	3	Lines
Left Margin	3	Spaces
Lines per Label	6	Down
Characters Across	36	
Skip Line After	5	Lines of Labels

At the bottom right of the dialog box, there are two buttons: "OK" and "Cancel".

You fill in your information according to what type of label sheet, you will be printing on. You can print test labels to test your setup.
